Step 2. Tools required

Pencil, tape measure, level, screw driver, pliers, step stool, drill.

Step 3. Installation

Your blind may be installed either inside the window frame or outside the window frame.

Wallboard or Plaster: use wall anchors.

Concrete, Stone, Brick: use a masonry drill bit and anchors or screws specifically designed for masonry (not included).

Inside Mounting:

One bracket should be positioned about 2" to 6" from each end of the head rail. For wider shades that require 3 or 4 brackets, these should be spaced evenly between the two outermost brackets.

Attach each bracket to the inner top of the window opening using the screws provided. Pre-drill the screw holes using a 5/64" drill bit. The extension brackets are not used for inside mounts.

For flush inside mounts, attach the brackets to the head rail first (see drawings and attachment instructions below), and then position the shade in the window opening as desired. Then make pencil marks at the back of each bracket. Remove the brackets by pressing on the plastic tab. Align the brackets with the pencil marks, and then screw them in place as described above.

Outside Mounting:

Attach the Extension Brackets to the wall or window framing. One bracket should be positioned about 2" to 6" from each end of the head rail. For wider shades that require 3 or 4 brackets, these should be spaced evenly between the two outermost brackets. Pre-drill the screw holes using a 5/64" drill bit.

The brackets must be level – use a Spirit Level if necessary to assure proper alignment.

Then attach a Mounting Bracket to each Extension Bracket using the nut and bolt pre-attached to each Extension Bracket.

To adjust head rail extension, remove the shade from the mounting brackets by pressing on the plastic tabs at the front of each bracket. Then loosen the nut and bolt, and move the mounting brackets forward or backward as preferred.

Step 4. Securing the Head Rail

Slide the inner rear of the head rail onto the metal tabs at the back of each bracket, and then push up so that the brackets snap onto the head rail.

IMPORTANT FINAL STEP TO PROPERLY SECURE BRACKETS:

pull the plastic tab on the front of each bracket outward toward the front of the shade to lock the brackets in place. For inside-mounts use pliers to grasp the tabs. Check carefully to assure that each bracket is properly secured
